

Eberspächer

Hochdruck Hydraulik • High-pressure hydraulics

Jacks with locking ring – extra flat

630 bar

60 – 1000 t

20 mm stroke

*Rent service: jacks with
locking ring, flat jacks,
pumps etc.*

We are your professional partner when it comes to heavy loads.

Spherical bearing plate floats $\pm x$ %. Permissible transverse force 2 %

- Jack suitable for restricted space conditions to facilitate replacement of bridge bearings.
- Extremely thin jack base – this therefore renders pressure distribution plates necessary.
- Wherever possible, the jack should be able to slide easily at the jack base or spherical bearing plate. It is necessary to equip the jack base or surface of the spherical bearing plate with sliding foil for this purpose. We recommend a stainless steel plate as the other sliding surface.
- If a spherical bearing plate which can move under load is required, it should be equipped with sliding foil within the curved sections.
